KT-RKIT40PS-22PD-8CSA-VDIM
LED PANEL DOORFRAME RETROFIT KIT

DESCRIPTION

2'x2' LED panel doorframe kit **|** 20, 30 and 40W **|**
120-277V input **|** 0-10V dimming

CLASSIFIED c(UL)us | DLC LISTED | TRUSTED N3 WARRANTY | **10 YEAR** LIMITED WARRANTY

PRODUCT FEATURES

- Used to Upgrade existing 2x2 fluorescent recessed troffer, without modifying existing fixture mounting.
- Keystone Color Select Technology: Adjustable CCT (3500K, 4000K, or 5000K)
- Keystone Power Select Technology: Adjustable (40W, 30W, or 20W)
- Construction features precise optical lenses over each individual LED, offering optimal light diffusion and consistent surface illumination, with no risk of yellowing over product lifetime

- Powered by Keystone 0-10V Dimming LED Driver
- Compatible with Keystone SmartSafe LED Emergency Drivers
- Suitable for damp locations
- Over 50% energy savings compared to traditional fluorescent troffers
- Operating temp range -20ºC/-4ºF to 40ºC/104ºF
- Power select technology, not for use with Smart Loop fixture controllers

PERFORMANCE SPECIFICATIONS

8 lbs

INSTALLATION INSTRUCTIONS
Always turn off the power supply from main circuit breaker first!

1. Dismantle accessories from the original housing (ballast, fluorescent tube, sockets, bracket and other accessories that may interfere the installation). Note: The original housing must be retained in place. Reserve the L&N wire of original housing to connect retrofit kit in later step. Plug previous holes from ballast with appropriate screws and nuts.

LED PANEL DOORFRAME RETROFIT KIT

2. Insert the two brackets into the clearance between the housing and T-grid.
3. Insert the two side bars into the clearance between the brackets and the T-grid.

4. Using the included self-tapping screws, use electronic screwdriver to secure brackets into place through bracket mounting holes from inside of the fixture. Caution: Luminaire wiring and electrical parts may be damaged when drilling for installation of LED retrofit kit. Ensure that enclosed wiring and components have not been damaged.
5. Embed the rotary screws on the edge of the panel into the bracket chutes. Push to the end in the direction of chutes to secure panel.

6. Connect L&N wire from original housing to the driver of the retrofit using appropriate connectors. If using 0-10V dimmer, connect DIM+,DIM- to 0-10V dimmer wires. Connect the green ground wire of the retrofit kit to the fixture with a wiring cap to ensure grounding safety.

7. Attach clips from the retrofit kit to the brackets.

8. Close the retrofit kit door into the fixture and rotate the clips to secure the door closed.
